BIOSTIM BORON, is for the prevention and correction of boron deficiency in crops. The ethanolamines of **BIOSTIM BORON** encourage absorption and translocation of boron inside the plant.

Application of **BIOSTIM BORON** is effective as a readily available source of Boron for foliar or soil applications. Boron is an essential element for plants: encourage flowering, pollination and development of fruits; increases quality and fruit conservation potential.

BIOSTIM BORON is compatible with most phytosanitaries and foliar fertilizers, however, it is recommended to perform chemical compatibility tests of the mixture before using it.
