BUILDING A NEW AGRICULTURE

BIOGROW MOL

BIOGROW MOL is a 100% soluble liquid organomineral fertilizer.

The manufacturing process of **BIOGROW MOL** based on aminoacids, allows to obtain a product with a high content of Organic Matter (> 43%), composed of Humic Acids. These elements and assets will favor water retention, increase cation exchange capacity (CIC), absorption of nutrients and potentiate microbiological activity in the soil, to allow better root and crop development.

BIOGROW MOL is indicated to be applied through irrigation systems.

BIOGROW MOL it's a fast and effective tool to improve the physical and chemical characteristics in soils with low content of organic matter.
